I from Batumi, Georgia. I graduated Batumi State University on the Master's course in Business Administration. On January I found a free Python course, my interest grown and finally I have decided to continue work. For now, writing code is a pleasure for me and perfect routine which I would like to do everyday. I am ready to accept and overcome any challenges. I am really hard working, purposeful and ambitious person. I am always doing my job well, thinking outside the box and founding cost-effective solutions and It is evidenced by my current job status and my work history in the student parliament.
